## 1. QR Details & Mode

**QR Configuration**  
Set up the basics of your QR before choosing its type and content.

**QR Name**  
 Mode Dynamic (recommended) Static

Optional label to help you recognize this QR in your dashboard.

**Description**

**Custom Permalink**  
 Leave empty to auto-generate from QR name

**Folder**

**Tags**  
No tags available.

Kat custom permalink, xleh nak letak '-' or any other character kt field

The screenshot shows the Light Up 7 application interface. On the left is a dark sidebar with the following navigation items:

- Light Up 7
- Dashboard
- QR Codes
- Analytics
- Design Studio

Below these are two sections under the heading "SETTINGS":

- Organization
- Teams & Members

At the bottom of the sidebar is a "Dark Mode" toggle switch, which is currently turned off (gray). To its right, the text "Dark Mode" is displayed.

On the right side of the interface, the main area is titled "Create QR Code" and contains the sub-instruction "Create and customize your static or dynamic QR codes". At the bottom of this area, there is a small "Get Started" button.

In the bottom right corner of the sidebar, there is a circular profile picture placeholder and the text "AT Ahmad Taufiq" followed by the email address "taufiqsalmi1474@gmail.com".

Dark mode x toggled lagi but  
already on dark mode, maybe  
follow system setting tpi x reflected  
kat button toggle

# Re-edit malfunction

The screenshot shows a user interface for customizing a QR code's appearance. On the left, under the 'Colors' section, there are several input fields:

- Dots Color:** A color swatch and a hex code field (#c4e232).
- Background Color:** A color swatch and a hex code field (#000000).
- Corner Squares Color:** A color swatch and a hex code field (#ffffff).
- Corner Dots Color:** A color swatch and a hex code field (#c4e232).
- DOTS GRADIENT:** A checked checkbox labeled 'Enable gradient for dots'.
- Start Color:** A color swatch and a hex code field (#595454).
- End Color:** A color swatch and a hex code field (#c4e232).
- Angle:** A slider with a value of 0°.

On the right, the 'Live Preview' section displays a QR code with a pattern of green dots and squares on a black background. Below the preview are download options: PNG, SVG, JPEG, and WebP. There are also buttons for 'Copy to Clipboard' and 'Website URL QR Code'.

**When I click 'Edit', the QR code automatically changes shape even though no changes have been applied yet.**

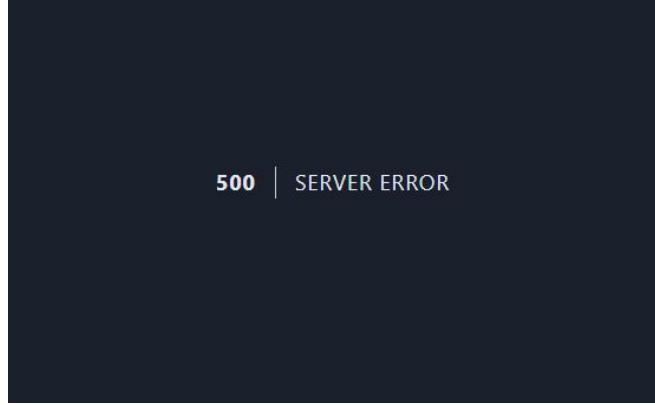

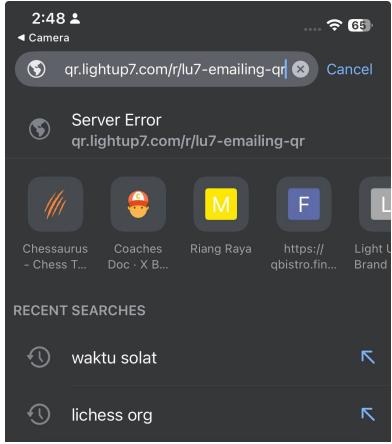

**This might be troublesome if we only want to change the URL and not the design.**

# Re-edit Save button malfunction

The screenshot shows a user interface for generating a QR code. At the top, there is a preview area displaying a lightbulb logo with the text "lightup7". Below this is a "Logo Size" slider set to 40% of the QR code. A "Size" section allows setting the output size in pixels, with a value of 300 currently entered. A note below states: "This controls the exported image size. The on-screen preview always uses a fixed size." At the bottom of the interface is a green "Update QR Code" button.

**No response when i clicked “Update QR Code”**

# Dynamic QR malfunction

Cannot open **Dynamic Location QR**

<https://qr.lightup7.com/r/lu7-office-location>

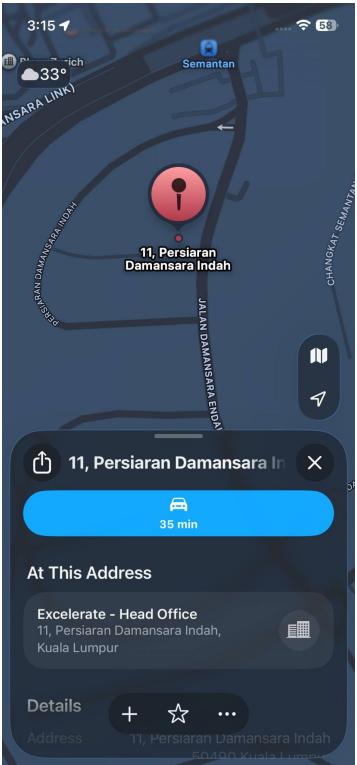

A screenshot of a QR code preview interface. It shows a QR code with a yellow and black pattern. Below the QR code, the text "QR Code Preview" and "Scan this QR code to test functionality" is displayed. To the right, there is a "LU7 Contact" card with the following details:

Destination	https://qr.lightup7.com/r/lu7-contact
Total Scans	1
Last Scanned	2/5/2026, 3:00:12 PM
Status	Active
Created	2/5/2026, 2:59:59 PM by Web Team Admin
Organization	No Folder - No tags

Cannot open **Dynamic Contact QR**

<https://qr.lightup7.com/r/lu7-contact>

# Static vs Dynamic: the issue?

Example using **static** for Location and Contact

Turns out, i just discovered that we only can use **Dynamic** for Website URL only

2. Select QR Code Type

POPULAR

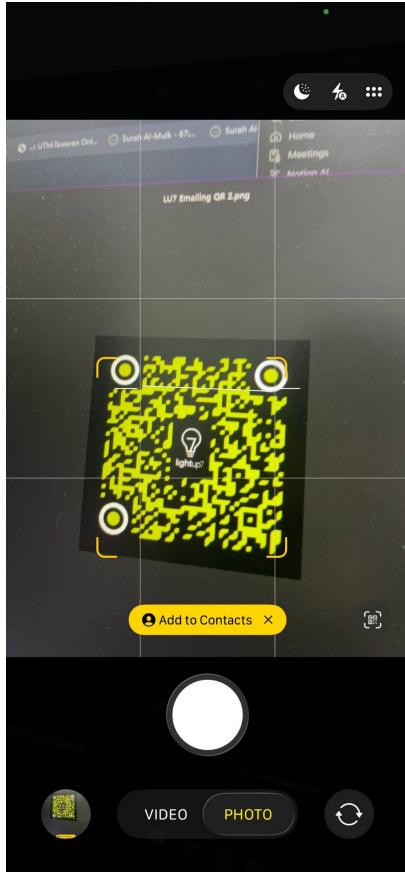

- Website URL**  
Link to any website or webpage
- Contact Card

ALL TYPES

- Website URL**  
Link to any website or webpage
- Contact Card
- WiFi Network
- Text Message**  
Pre-filled SMS message
- Email
- Phone Number
- Location
- Calendar Event

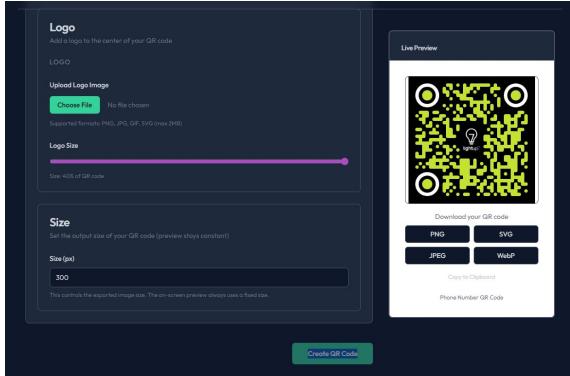

Hide these on **Static** , or make new option selector : **Dynamic** for Website URL, **Static** for all

# Static Email QR malfunction

**Static Email QR are saved as contact instead of mailto: format**

# Phone Number QR malfunction

**Cannot Save the Qr on *Dynamic* Phone Number**

A screenshot of a QR code generator interface. On the left, under '3. Configure Content', there's a 'Configure Phone Number' section with a text input field containing '017442968'. Under '4. Customize Design', there's a 'Design Options' section with a 'Apply Brand Kit' button and two dropdown menus labeled 'Test' and 'LU7'. On the right, there's a 'Live Preview' section with a placeholder message 'Configure your QR code to see a preview' and a 'Phone Number QR Code' label below it.

**QR preview are not visible in *Static* Phone Number**

# Applying QR Brand Kit

The screenshot shows a dark-themed interface for customizing QR code colors. At the top, there are two examples: 'Test' (black and white dots) and 'LU7' (yellow and black dots). Below this is a section titled 'Colors' with the sub-instruction 'Customize the colors of your QR code'. The 'COLORS' section contains four color swatches:

- Dots Color:** Yellow (#c4e232)
- Background Color:** Black (#000000)
- Corner Squares Color:** White (#ffffff)
- Corner Dots Color:** Yellow (#c4e232)

Below these are sections for 'DOTS GRADIENT' and 'Angle'. Under 'DOTS GRADIENT', there are 'Start Color' (yellow) and 'End Color' (white) swatches, both labeled '#c4e232'. A horizontal slider for 'Angle' is set to 70°.

**Maybe can add button to save changes on Brand Kit too on the Create QR page**
